Portfolio Manager - Facet

Established in 1979, FACET Investment Management Limited is a provider of investment management services to both individuals and corporate clients. Our multi-asset class portfolios give exposure to a wide variety of opportunities and help to manage risk within portfolios. Historically Facet's model portfolios have consistently outperformed numerous established benchmarks and comparable indices.

Key Investment Managers

Chris Fernyhough - Chris has over 15 years' experience managing multi-asset portfolios. Prior to becoming Managing Director of FACET, Chris worked at WH Ireland establishing their Bristol office. He also worked at Newland in the wealth management division. He holds a distinction in the PCIAM exam and is a Chartered Wealth Manager as well as holding Chartered FCSI status with the CISI

John Richard Mitchell - John has a career spanning over 40 years in both equities and bonds. He managed risk at Credit Suisse before moving to Royal London where he implemented risk for their first geared fund. John was also involved in the founding of Newland Financial where he was the compliance director.

Alex Young - Alex has been in Financial Services with FACET for 20 years. He is a qualified IFA as well as holding IMC, a certificate in Discretionary Investment Management, a certificate in Securities Advice and Dealing and a diploma in Technical Analysis.

Portfolio Manager's Comments

The positive momentum seen in global stock markets in November, carried on into December with the US and UK main indexes rising by 4.5% and 3.75% respectively. The fall in US inflation, down to 3.1% in November, gave the US Federal Reserve the confidence to issue more reassuring forward guidance on interest rates in 2024. This was reflected in the US bond market where the US 10-year Treasury yield fell from 4.35% to 3.86%. There was a similar fall in the UK 10-year yield despite UK inflation remaining stubbornly high at 3.9%. However, markets will expect both the Bank of England and the European Central Bank to follow the Federal Reserve if they see fit to cut interest rates in the summer or autumn months. For now, just the fact that the interest rate hiking cycle appears to have ended was sufficient to underpin a significant rise in both stocks and bonds into the year end. The US dollar weakened around 2% against the basket of major currencies and Sterling was 1% stronger against the US dollar. The slightly weaker US dollar helped to drive the price of gold to a new all-time high of \$2,075. Despite better news on the inflation front, there remained some caution on the state of the developing world economies trying to cope with interest rates which, for now, remain high. The price of oil, a reliable indicator of levels of economic activity, fell 6.7% to \$77 per barrel, a significant drop from \$93 seen in September following production cuts announced by OPEC. However, the price has also been influenced by geopolitical concerns in the Middle East which appeared to be escalating into the new year.

In December this portfolio outperformed its benchmark, the fund has now been running for a year and is closing the gap for underperformance. It remains the opinion of the investment committee that we remain in a good mix of funds that will produce a continued performance against the selected benchmark over the medium to longer term. We continue to monitor the portfolio, looking for possible improvements we can make to our respective portfolios.

We continue to avoid property funds due to concerns of the liquidity in the property sector.

Any position changes made in the portfolios should not be taken as a buy or sell signal of any assets.

**Using Facet Aviva Risk 4 performance pre-1st March 2020, and Facet Model Portfolio Risk 10 post 1st March. This is due to Facet only running risk models 1-4 as opposed to the new 1-10 risk models available now.

IMPORTANT INFORMATION This document has been produced by FACET Investment Management Limited for information only and represents the views of the investment manager at the time of writing. It should not be construed as Investment Advice. No investment decisions should be made without first seeking advice. The Model Portfolio Risk Level 10 is managed by Facet Investment Management Limited, which is authorised and regulated by the Financial Conduct Authority. Before making an investment, you should ensure that you have read and understood the relevant Key Investor Information documents, for all the underlining funds within the portfolio

Slight deviations in the underlying assets for this portfolio may be required subject to availability of investments on the investment platform you are with. Not all platforms have our preferred investment choices available. In this instance, appropriate substitutions will be made.

WARNINGS The Model Portfolio Risk Level 10 is subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back all the money that you invested. Investments in overseas equities may be affected by changes in exchange rates, which could cause the value of your client's investment to increase or diminish. You should regard their investment as medium to long term. Past performance is not a guide to future performance. Every effort is taken to ensure the accuracy of this data, but no warranties are given. Some of the funds within the portfolio could in exceptional circumstances be subject to a temporary suspension.

All performance figures are cumulative and do not include external or FACET charges

The models are available on a range of platforms and as such holdings, charges and performance may vary

The ongoing charges figure (OCF) shown is correct as at the date of this factsheet but will vary in future depending on the holdings within the Model Portfolio Expense - The portfolio expense is calculated using the weighted value of the Ongoing Costs Ex Ante of the portfolio constituents. Where the Ongoing Costs Ex Ante is not available the OCF is used, and where this is not available the TER is used
